World Leaders in Automotive Finishes

Make it happen. With PPG

# PPG

Respected Global Supplier

## The PPG Group

Founded in 1883 in Pittsburgh Ohio, PPG Industries is a highly respected global supplier of coatings, glass and chemicals, employing more than 30,000 people in 21 countries worldwide.

The company has long been at the forefront of technology in each of its major industries. The company's continuing emphasis on the development of breakthrough products and processes, investment in highly productive manufacturing facilities and establishing an effective global organisation combine to provide customers throughout the world with the best services and products of the highest quality.

The company embraces the Quality Process to fully meet customer requirements and do things right the first time, every time.

PPG is dedicated to continued leadership in its businesses, and to the fulfilment of its obligations to customers, shareholders, employees and the communities and nations in which it operates.

## Refinish Coatings

When you choose PPG you benefit from our 75 years of experience in developing automotive coatings. Regardless of the application, you can expect PPG to meet or exceed the

most demanding requirements for gloss, durability, ease of use and compliance with European legislation.

Indeed, today, two out of every three cars made in Europe and North America now use PPG technology and know-how, making PPG the motor manufacturer's choice.

## The Choice of Motor Manufacturers

With the introduction of its patented nano-technology, PPG is at the forefront of advanced clearcoat technology.

As the first supplier of nano-technology to Motor Manufacturers, PPG offers the market a durable scratch-resistant clearcoat, which retains its gloss for much longer.

CeramiClear contains nano-particles which accumulate on the surface of the clearcoat, to give it a durable, scratch-resistant glossy finish, proven in numerous rigorous laboratory and road tests.

# The Collision Compliant Solution

UHS Direct Gloss / Engine Bay / Envirobase / Clearcoats / Primers

With the new European VOC legislation, it's vital that you find a compliant solution that supports your business needs.

## Envirobase

The fast, easy to use waterborne basecoat that provides a perfect colour match every time, allowing you to comply with legislation, whilst also maximising productivity and profitability.

**Envirobase** uses the very latest waterborne technology to deliver a basecoat system that is easy to apply. Using normal guns and techniques, Envirobase offers a choice of application methods to suit individual bodyshop needs. In addition the final light coat application gives excellent aluminium laydown and a consistent colour match, whilst the ease of fade out gives an invisible colour blend easily, every time.

- Excellent aluminium control
- Consistent colour match
- Non-stir system - tinters can simply be shaken before use
- Ease of fade out gives an invisible colour blend easily, every time

Envirobase: the waterborne basecoat system built around your needs.

## Deltron Progress UHS Direct Gloss

Whether you are an existing UHS Direct Gloss user or you are making the move to a compliant solvent system for the first time, you'll find that the **Deltron Progress UHS DG** range supports you every step of the way.

The first thing you'll notice is the outstanding opacity of the product range.

This means that you'll need fewer coats, saving you time and money together with material savings of up to 25% over conventional MS systems. This new system now features a genuine 10 minute bake option, giving you maximum process efficiency. But the benefits don't stop there. The introduction of a brand new lead free compact mixing scheme will reduce your stockholding requirements and you'll also find that the new range is easier to use. For example, we've improved the gloss hold out so that you get a high quality repair whilst reducing the need to polish. We've also improved the colour matching accuracy of the tinters and ensured that they align to current and future OEM trends.

- A completely new solventborne topcoat offer
- Works alongside Envirobase to provide a highly competitive system
- Compact hardener and thinner range
- OEM approved system

### Clearcoats

PPG has a flexible range of premium clearcoats to meet every requirement. All are easy to use and are fully aligned to OEM requirements.

- **D8141: Deltron Progress UHS Clearcoat** combines flexibility and ease of use.
- **D8137: UHS Clearcoat**  
An premium, compliant and durable clearcoat with excellent performance.
- **D8105: CeramiClear**  
A specialist scratch resistant Clearcoat which has been specifically designed to match OE scratch resistant finishes.
- **D8122: CeramiClear 8122**  
Performs to a higher level of scratch resistance than standard market clearcoats, without compromising on fadeout and polishing characteristics.

### Primers

To ensure the right finish, you need the right Primer. That's why PPG has a flexible range of compliant primers that are easy to use and are fully aligned to the OEM market.

- **D8010/D8017 Rapid Greymatic Primers**  
Rapid Greymatic is our lead premium surfacer. It's easy to use and easy to sand and gives a good topcoat appearance.

### Engine Bay

The unique new **Engine Bay** repair system from PPG gives you faster process times over conventional repair methods, whilst still accurately matching the original OEM colour. The process centres around a new Engine Bay Converter - D8011, that quickly and easily transforms the Deltron Progress UHS DG Scheme into an Engine Bay System.

# Complete Commercial Transport Solutions

Delfleet

## Comprehensive System

**Delfleet** is PPG's refinish paint system for the commercial vehicle sector. Whether the requirement is for a simple colour scheme or a multi-coloured livery, Delfleet delivers exceptional durability and gloss together with excellent appearance. Easy to apply, Delfleet meets the needs of both the paint shop and fleet operator - it is the preferred choice of many of the world's leading commercial vehicles manufacturers. As a compliant system, Delfleet also meets the demands of European VOC legislation.

## Customer Focus

In today's fiercely competitive marketplace, Delfleet offers a range of advantages:

- **Reduced process time** - Delfleet is quick and easy to apply and is ideal for fleet owners who want attractive designs and excellent final appearance.
- **A complete solution** - Delfleet offers bodyshops a comprehensive painting system that meets technical and warranty requirements.
- **Flexibility** - the Delfleet system offers a range of solutions to meet the needs of an ever changing marketplace and delivers a competitive advantage to our customers.

## Delfleet Colour Selector

The new **Delfleet Colour Selector** is a chromatically ordered, solid colour system that reflects PPG's strength in colour. Comprising more than 1500 solid colour formulas, the library also incorporates a significant number of references for the most important fleet colour families.

The Colour Selector is housed in a robust, durable case that makes it ideal for use as a mobile colour tool device.

### Colour Match Quality

Colour match quality is the ultimate test of a refinish repair. PPG excels in this arena. As a leading supplier to the motor manufacturers, PPG's extensive expertise enables us to stay on top of emerging colour trends and evolving motor manufacturer colour standards.

To match those standards, the well-trained eyes of PPG's expert global colour matchers ensure precise colour matches for PPG refinish systems.

PPG supports its colour matching effort with the latest in colour match tools, systems and technology.

### Prophet

The **Prophet** device combines the collision repair industry's most advanced spectrophotometer with the ability to link with PPG's extensive colour formula database. Providing a quick, accurate way to aid in matching today's vehicles using spectrophotometer technology.

### Colour Tribe

**Colour Tribe** gives you access to up to date colour information in an easy to use CD format. Quarterly updates ensure you're always at the forefront of colour knowledge.

### Online Colour

**Online Colour** offers the latest in colour formula and information retrieval to speed the efficiency of your shop's paint department. This is real-time, always-on access to our colour database, available through [www.ppgrefinish.com](http://www.ppgrefinish.com)

### Customer Service

In addition to the local support from our distributor networks, PPG backs up colour match tools and systems with expert teams fluent in all aspects of our colour offer, and dedicated customer service lines in every country.

### Touchmix

Mixing paint has never been so easy. **TouchMix** is a Windows computer equipped with a touch screen, and housed in a robust case suitable for industrial environments. When operating with the new touch base software, it becomes the most powerful mixing station ever experienced in the bodyshop. No more need for mouse and keyboard strokes: just simple touches on big and easily understood icons guide the user through mixing.

### Colour Boxes

PPG is dedicated to delivering fully comprehensive colour chip systems, manufactured using our paint and sprayed to maximise the accuracy and reproducibility seen in the bodyshop. The Variant systems are updated three times a year, making sure the most recent colours are always available.

# PPG

## Training programmes

### The Complete Solution

PPG offers a complete training program with both practical and theoretical aspects suitable to your company's needs. Training is an important tool to increase the efficiency and profitability in your day-to-day business.

# PPG

Official Paint Supplier to the WilliamsF1 Team

## Make the Same Choice that the WilliamsF1 Team made. PPG.
